Denver, Colorado

### WORK HISTORY

---

#### **Front End Developer** **Omnia Marketing Systems**

January 2018 - current  
155 Cook Street,  
Denver CO 80206

- Introduce, design, develop and maintain a new UI for the Omnia CMS platform.
- Develop live web prototypes and UI deliverables such as interface design mock ups and wireframes.
- Provide analytical and problem-solving skills to work on complex challenges requiring research and modern software development principles.
- Assign and lead walk-throughs, usability testing and update UI per changing needs, features and requirements.

#### **Web Developer** **Denver Website Designs**

January 2018 - current  
155 Cook Street,  
Denver CO 80206

- Work close with clients and project managers to build highly responsive, custom websites and web applications and establish tailored marketing strategies.
- Helped create interactive prototypes and UI specifications, including screen layouts, color palettes, typography, and user-interface elements.
- Provide support to team members in solving problems, analyzing designs and performing peer reviews.

#### **Web Developer** **Holy Name Medical Center**

July 2015 – November 2017  
718 Teaneck Road,  
Teaneck NJ 07666

- Introduce modern technologies and coding practices to produce optimal user experiences and simultaneously introduce responsive web design.
- Collaborate with team members in an agile environment to develop medical and health-based web applications using ASP.Net and PHP.
- Work closely alongside clients to create various frontend assets and digital marketing media including HTML emails, flyers, posters and digital ads.
- Assist in branding design and identity for new internal businesses and branching offices.

#### **Desktop Technician** **Holy Name Medical Center**

February 2014 – July 2015  
718 Teaneck Road,  
Teaneck NJ 07666

- Troubleshoot computer systems, terminals and servers.
- Operate, and restore tape drive back-ups using an iSeries (AS/400) library tape system.
- Manage user accounts and troubleshoot internally developed hospital information systems.
- Manage, organize, query and submit reports of controlled and secure patient records and data while following HIPAA protocols and practices.
